

Application No.: 10/754,797
Response to Office Action of November 24, 2004
Attorney Docket: WETCO-001B

Amendments to the Specification:

Please replace paragraph [0038] with the following amended paragraph:

[0038] The data in Table 5 illustrate hardness (CaCO₃) scale removal from metal surfaces in a tower system treated with the methods of the present invention through coupon weight loss reduction. Standard metal coupons that were scaled with CaCO₃ film were weighed before and after ten days of exposure and the visible removal of most of the scale thickness. The demonstrated CaCO₃ weight loss rate will provide gradual removal of hardness scale deposits that have occurred in a system prior to method treatment.
